26.3. The number of points the customer has determines their personal status. There are seven statuses in total:

1. **Scout** (0–100 points)
2. **Nomad** (100–500 points)

3. **Explorer** (500–2 500 points)
4. **Captain** (2 500–12 500 points)
5. **Hunter** (12 500–25 000 points)
6. **Emperor** (25 000–50 000 points)
7. **Adventurer** (50 000+ points)

26.4. Customers must verify their email address before they can convert their points into real money.

26.5. There are several different points-to-money exchange rates. The exchange rate depends on the customer's status. In addition, when a customer's status increases, they are awarded special bonuses:

Status	Number of points	Exchange rate
Scout	0–100 points	600:1
Nomad	100–500 points	525:1
Explorer	500–2 500 points	450:1
Captain	2 500–12 500 points	375:1
Hunter	12 500–25 000 points	300:1
Emperor	25 000–50 000 points	225:1

Status	Number of points	Exchange rate
Adventurer	50 000+ points	150:1

26.6. The customer can see how many points they have and exchange them for money in their account. They can do this by pressing the status icon.

26.7. We have the right to remove points from a customer's account if they have not used them for six months or more.

26.8. If we suspect a customer of misusing or attempting to misuse bonus points or any other form of promotion, including misusing the absence of certain information in the Agreement, we have the right to prohibit, refuse or withhold the payment of points or any other incentive. We also reserve the right to temporarily or permanently change our policy towards the customer in question and/or to block their access to our website's services and their account. We shall not be liable for compensating the customer for any funds which may have been present on their account, except the amount of their initial deposit.

27. Bonuses

27.1. The customer can receive rewards in the form of bonuses for registering on the Website and participating in special promotions. By accepting this Agreement, the customer confirms that they understand and accept the terms and conditions of any bonus that they may receive on the Website.

27.2. Each customer's balance is divided into two parts: real balance and bonus balance. The real balance reflects the customer's real monetary funds, while the bonus balance shows the amount the customer has received through bonuses on the website. All bonus funds are automatically credited to the customer's bonus balance, unless stated otherwise in the terms and conditions of the bonus promotion.

27.3. The wagering requirement of a bonus is the amount you need to bet in order to transfer the bonus funds to your main account. Bets placed in Live Casino, Instant and Table games (in particular, roulette and card games) do not count towards wagering requirements.

27.4. The maximum stake that can count towards a bonus wagering requirement is not limited.

27.5. When placing bets, the customer first wagers any bonus amount that they have received. Deposit wagering (the condition according to which the customer must wager twice their deposit amount) only occurs when the customer's bonus balance equals 0. Please remember that, under item 8.11.4 of this Agreement, the Company has the right to withhold 10–30% of the customer's withdrawal amount if they have not completely wagered their deposit.

27.6. The customer can refuse a bonus at any time by resetting their bonus balance. To decline any existing bonus funds, the customer should go to their profile and press the “Reset bonuses” button.

27.7. If the customer has funds in both their real and bonus balance, all bets will be placed using funds from their bonus balance first. Bonus funds will be used until the bonus balance reaches 0, or until the bonus wagering requirements have been fully met and the bonus has been transferred to the customer’s real balance. Funds in the real balance will only be used in bets if the bonus balance equals 0.

27.8. Any winnings obtained by the customer while still wagering a bonus will appear in their bonus balance and cannot be withdrawn until the bonus has been fully wagered.

27.8.1. Maximum cashout for bonus balance is capped at five times (x5) the initial deposit amount. This means that any winnings derived from bonus funds cannot exceed five times (x5) the value of the deposit made to activate the bonus.

27.9. If the value of a stake is greater than the amount remaining in the customer’s bonus balance, the deficit shall be covered by funds from their real balance. If the customer wins, their prize will be credited to their bonus balance. If the customer loses, their bonus balance will become 0, and the difference will be deducted from their real balance.

27.10. When wagering a bonus, the customer may participate in other promotions and obtain new bonuses. If this happens, the value of any new bonus will be added to funds in their bonus balance. The wagering terms and conditions will also be combined. If it is a deposit bonus, the deposit amount will be added to the customer’s real balance.

27.11. To participate in any promotion and be credited with the corresponding bonus, customers must activate the bonus on the Promotions page before making a deposit.

27.12. Only one bonus may be active at any one time. Once activated, the bonus will be moved to the “Active promotions” section of the Promotions page, where it will remain until its conditions have been fulfilled or the promotion ends. Other bonus offers will become available to activate once the terms of the active bonus have been fulfilled.

27.13. Being redirected to the Website through links from newsletters, social media, messenger apps or any other message containing information about a bonus will not necessarily activate the promotion. In order to be credited a bonus, the customer must ensure that the bonus is in the “Active promotions” section before making a deposit (and press “Activate” on the Promotions page if the bonus is not active). If the bonus is not activated before a deposit is made, it will not be credited.

27.14. The Website’s management shall not force the customer to participate in any promotions or bonus offers – each customer participates in them voluntarily and is free to change their mind at any time. If the customer activates a bonus by mistake (before making a deposit), they can:

- a) activate a different bonus, which will deactivate the current active bonus;
- b) deactivate the bonus by pressing "Deactivate" in the "Active promotions" section.

27.15. Customers can only withdraw funds from their real balance. When a customer makes a withdrawal, their bonus balance is voided the moment a withdrawal request is created. If, for whatever reason, a withdrawal is not successful, the funds can be returned to the customer's real balance, but bonuses will not be refunded.

27.16. Bonuses and any winnings earned from bets using the customer's bonus balance will be automatically voided within 60 days of receipt of the bonus if the bonus is not wagered in accordance with the wagering terms and conditions.

27.17. All customers have the right to void their bonus balance and only play using real funds. The customer can do this themselves by pressing the relevant button in their profile. When the bonus balance is voided, all bonus wagering conditions and progress are voided as well.

27.18. Bonus funds cannot be used to purchase spins on the Wheel of Fortune, lottery tickets, instant lottery tickets, or to pay for participation in other promotions on the Website. Such purchases can only be made using funds in the customer's real balance. If there are insufficient funds to complete the purchase, the purchase will not go through.

27.19. Cashback is a weekly refund of a certain percentage of any funds lost by the customer. The cashback percentage is determined by the customer's status in the loyalty program. Only bets placed using funds in the customer's real balance count towards the calculation of cashback. Changes in the customer's bonus balance in no way affect the calculated cashback amount.

27.19.1. The one-off cashback amount credited to each customer cannot exceed the amount of their deposits over the entire period of use of the casino by more than 5 times. This cashback amount is calculated separately each time the cashback is credited to a customer.

27.20. Loyalty program points are not credited for betting using bonus funds and the customer will not progress in terms of their current status in any way.

27.21. Free spins received by the customer as a bonus are valid for 14 days. At the end of this validity period, the free spins will be voided.

27.22.
